LABEL TUBE AS SHOWN

Using **RED-TOPPED TUBES**, fill each tube to be submitted for testing with 2cc or more of whole blood. Sequentially label tubes (1, 2, 3 and so on) along with corresponding ID number from the animal's ear tag. Use permanent marker to avoid smearing. Proper labeling assists the laboratory in sample organization and helps to speed results.

➤ **TUBE SEQUENCE NUMBER**

➤ **ANIMAL ID NUMBER FROM EAR TAG**
